

Blast Nozzle Information (ZVP-PC-0027-01)

! WARNING ! – READ BELOW INFORMATION BEFORE USING THE BLAST NOZZLE

- 1.0 Always use a Nozzle Washer to prevent excessive Blast Nozzle wear. Care should be taken that the Nozzle Washer and the Blast Nozzle fit squarely against the cut end of the Blast Hose in the Nozzle Holder.
- 2.0 Threads should be cleaned of debris and abrasive media from both the Blast Nozzle and the Nozzle Holder before the Blast Nozzle is screwed into the Nozzle Holder.
- 3.0 Always replace the Blast Nozzle when the internal bore becomes one size larger than the original size.
- 4.0 Never expose your hand or body to direct contact with the abrasive blast stream, always wear approved safety equipment (PPE) and clothing whilst abrasive blasting.
- 5.0 Always check that the Blast Nozzle is securely screwed into the Nozzle Holder before use.
- 6.0 Avoid shock impact on the Blast Nozzle outer jacket, it will cause internal liner damage.
- 7.0 Always inspect the Blast Nozzle liner before use. Never use broken or fractured Blast Nozzle liner.
